Distributed to all MHMR Centers Via E-mail

CLARIFICATION

Code 10 - Medicaid Provider Relations  
MAC Guide FFY 2006

For entities that have both an internal provider function (e.g., physician providing medication management services for the MHMR Center) and an external provider role (e.g., private practice that provides medication management services post discharge from MHMR services):

Code 10 would be used only for those activities that support the development and continuance of the external provider role (e.g., recruiting, technical assistance and training of the provider of aftercare functions); and

Code 15 would be used for activities that support the internal provider function (e.g., technical assistance in the MHMR Center's client tracking or billing system, training on administering the Texas Recommended Authorization Guidelines (TRAG)).
